PROFESSIONAL SUMMARY:

AWS Cloud Engineer with 3+ years of experience in managing and optimizing cloud infrastructure and DevOps services, primarily for a **NSk and MMC** client. Proficient in a wide range of AWS services including **EC2, S3, VPC, IAM, CloudWatch, RDS and Amazon Workspace**. I am skilled in DevOps practices such as **CI/CD pipeline, Docker containerization**, and monitoring using tools like CloudWatch and Jenkins, and some amount of worked on **Kubernetes and terraform** Experienced in direct client communication,

WORK EXPERIENCE:

AWS DevOps:

Tata consultancy services, Nagpur

August 2022 – Present

- Deployed and managed scalable Amazon “**EC2 instances**” more than 40+ to host applications, utilized EBS volumes also.
- I worked on “**IAM and IAM Identity center**”.
- Created policies and roles on customer requirements following the principle of least privilege, improving security posture across AWS environments.
- Deployed and managed “**Amazon Workspaces**” 500+ for remote workforce enablement, integrated with Active Directory and MFA Key.
- improving onboarding speed and reducing hardware dependency by 40%.
- Worked on subnet creation (Private/Public) for “**RDS and Ec2**”.
- created NAT gateway, elastic Ip and route table for configuration and security purposes.
- worked on “**Docker-file creation**” and “**Built Docker images**”.
- Integrated Jenkins with Git, Docker and other tools reducing deployment time by 60%.
- Managed containerized applications on “**Kubernetes clusters**”.
- Created and managed AWS resources (e.g. EC2, S3, VPC, RDS) using “**Terraform**”.
- For monitoring CloudWatch metrics created.
- Handled ServiceNow tickets for each task.
- Identified, troubleshooted, and resolved defects across CI/CD, infrastructure, and application layers, improving system stability and deployment success rates.

RESPONSIBILITY -

- EC2, RDS parameter sheet creation for management and auditing.
- Implemented unit wise IIC groups to enhance security and access control.
- Worked on configured **bastion host(“Jump server”)** setup for customers.
- Currently working on 2 projects simultaneously
- Performed workspace debugging and troubleshooting.
- worked on “**AWS Cost optimization**” activity of Ec2 and workspaces.
- worked on “**Amazon EventBridge**” and “**Automated**” start, stop ec2 and rds.
- Created and modified 20+ SOP (for new and existing activity).
- On daily basis checking the status of Containers
- Provisioned worked on Exited Containers in Docker.
- Created CR AND SR in ServiceNow.

Cloud Intern:

Tata consultancy services, Nagpur

Jan 2022 - June2022

SKILLS:
